

Dallase Scott

Dallase Scott is the Director of Change Management at GreenerU. For the past 10 years Dallase has focused on, and developed an expertise in, the human dimension side of sustainability. She has leveraged her in-depth knowledge of sustainability, behavior change theory, and the operations of higher education to develop GreenerU programs from conception through implementation.

At GreenerU, Dallase leads a team that focuses on supporting our clients in the preparation and adoption of the new realities brought about by changes in building technology, processes, organization structures, and campus culture. Her staff are trained in effective facilitation and have subject matter expertise in campus sustainability and behavior theory. They are skilled in working collaboratively with and through others to develop programs that will support the adoption of desired behaviors to help realize sustainability goals.

In her role at GreenerU, Dallase also serves as the Director of Sustainability at Babson College. She led the establishment of Babson's Sustainability Office in 2010 and has since worked with Babson's leadership to establish a vision and set strategic goals for the College. In her role at Babson, Dallase provides comprehensive services for planning, initiation of campaigns, student outreach, and implementation of the College's sustainability activities. In addition, Dallase oversees the Sustainability Leadership Team, a strategic advisory group that guides the integration of sustainability into Babson's core values and builds awareness of the impacts that personal and organizational decisions have on the environment and society.

In addition to her work at Babson, Dallase has worked with numerous GreenerU clients providing a variety of change management and sustainability planning services. She provides structure and accountability in her role as lead facilitator in the development of the Ivy+ Sustainability Consortium's strategic plan. Dallase managed the development and implementation of the Dorm Energy Efficiency Project at Brown University where she worked with residential life and facilities management in targeting key energy saving behaviors in residential buildings. In addition, she developed and facilitated 12-hour workshops for student leaders, incorporating behavior change theory, communication and stakeholder mapping for multiple schools including Boston College.

Dallase received her M.A. in Urban and Environmental Policy and Planning at Tufts University, with her academic focus in behavior change communication. While at Tufts, Dallase designed and taught a course examining current environmental issues through the lens of psychology, social marketing and critical thinking. Her graduate thesis "[Shifting from Saying to Doing: Evaluation of an Environmental Course Designed to Create Environmental Change Agents](#)" was recognized in 2010 by the Association for the Advancement of Sustainability in Higher Education (AASHE) for the *Student Research on Campus Sustainability Award*, and by the Tufts University Annual Graduate School of Arts & Sciences and School of Engineering *Graduate Student Award for Outstanding Contributions to Undergraduate Education*.

Prior to graduate school, Dallase spent two years as a United States Peace Corps Volunteer in the Eastern Caribbean where she worked with the Ministry of Social Transformation, Culture and Local Government as a community development worker. During those two years, Dallase was a research assistant to the lead consultant in implementing the UNIFEM/UNDP/UNICEP/UNAIDS project, *Addressing Gender and*

Cultural Issues in HIV Prevention among Young People in St. Lucia and Dominica. She worked with environmental organizations, including directing a watershed protection youth program for Caribbean Student Environmental Alliance and providing organizational support for St. Lucia Forestry. Dallase also developed and taught environmental education classes for her village's primary and secondary schools.

Dallase found her career focus in her undergraduate studies at California State University, Chico. Her honors research at CSU, Chico focused on the correlation between an individual's personal health choices and their littering behaviors. In addition, she worked on campus as the Assistant to Environmental Programs where she was the key collaborator with several environmental programs on and off campus, serving on the planning committee for the first *This Way To Sustainability* conference, an annual event which still takes place today. Graduating from California State University, Chico, Dallase received a B.A in Psychology.
