## Joanna Lau

Joanna is a board director, CEO and entrepreneur with significant experience in the defense, biometric, security and software industries. She is the founder and CEO of Lau Technologies, a technology development company and provider of debt and equity financing and consulting services to middle market sized companies. Formed in 1990, LAU Technologies grew into three business units and, in 1995, she won the National Entrepreneur of the Year Award sponsored by INC and Ernst & Young. Before founding Lau Technologies, Joanna led various engineering programs at Digital Equipment Corporation and General Electric. Joanna earned a Bachelor of Science degree in computer sciences and applied math from SUNY-Stony Brook, a Master of Science in computer sciences from Old Dominion University, an MBA from Boston University, and honorary doctorates from Bryant College, Bentley University, and Suffolk University.
